

Watershed Stewards Academy May 2024 Newsletter

Hello Watershed Stewards!

We have some exciting news to share with you about a new Facebook page for Watershed Stewards Academy. If you have not already done so, please click on the link below and 'like' or 'follow' the page. There is also a private group page for Maryland WSA stewards only where you can post your activities and collaborate with other Maryland stewards. To access this private group from the main Facebook page, click on 'More' and then 'Group' to request to join the group.

<https://www.facebook.com/people/UMD-Extension-Watershed-Stewards-Academy/61550700817860/>

Please remember to enter your projects and volunteer hours into the WSA database and reporting system. Click [here](#) to log in!

Featured Steward

This past March, **Amietee Fuondjing** of the **Anacostia Watershed Stewards Academy** completed his capstone project in the main courtyard at Burtonsville Elementary School (BES). In September of 2023, Amietee organized a walkthrough of the planting location and henceforth submitted his capstone proposal. In October, he presented his planting design plans to BES, which was finalized in November. To determine the types of trees to plant, Amietee conducted a poll with the school. Students were presented with different choices of native species and once the votes were in, a budget was finalized in December.

and once the votes were in, a budget was finalized in December.

Just a few days before the planting event, Amietee gave a presentation to five fifth grade classes at Burtonsville Elementary School as a primer for the tree planting happening later that week. In his presentation, he talked about what a watershed is, the Anacostia watershed, and watershed topics such as the impact of runoff.

On Thursday, March 21st, Amietee, together with the 5th grade class (115 students) and with friends from the Anacostia Watershed Society planted a total of 9 trees (5 Fringe trees, 2 Witch Hazel, 1 American Hornbeam, and 1 American Persimmon). The planting lasted the entire school day, from 9 am to 4 pm. Each class participated in a 20 minute workshop led by Jamie Craven, an Environmental Educator with the Anacostia Watershed Society, which highlighted the effects of runoff on pervious vs. impervious surfaces. Following the workshop, the tree planting portion was led by Matthew Reise, a Green Infrastructure Specialist for the

Anacostia Watershed Society, and Amietee. Throughout the day, each class took turns digging and planting trees, getting them to all 9 trees in the ground by day's end. Amietee reflects on having the pleasure of watching the 5th graders in the beginning of the week go from having no clue about the Anacostia watershed to becoming novice experts, all while showing genuine excitement. Looking ahead, Amietee is optimistic about MoCo's increasing presence in watershed related outreach.

He encourages schools like BES, who aims to be a Maryland Certified Green School, to implement more community-oriented and out-of-the-box activities such as this one. (Bonus: Now BES makes an activity out of allowing students to water the trees weekly!)

Continuing Education

Financial Assistance for Septic Systems and Wells

Wednesday, May 15, 2024, 12 – 12:40 pm

There are several financial assistance programs including grants and low interest loans available to qualifying homeowners for repairs to their private well or septic system. This webinar will discuss those programs.

For more information or to register, click [here](#).

What a Warming World Means for Plants, Pests and Pollinators

Tuesday, June 18, 2024, 7pm

How will a hotter planet reshape the insect world? In our June evening webinar, join entomologist and author Michael Raupp for a look at the future of insects, both pests and pollinators. He will reveal how climate change is shifting weather patterns around the globe, and what that means for insects and mites in the mid-Atlantic. Learn how rising temperatures impact insect abundance, distributions, seasonal behaviors and the web of interactions among plants, herbivores and their natural enemies.

FREE Guided Tour: Preserve at Eisenhower Golf Course

Saturday, May 18, 2024, 8 – 10 am

Location: The Preserve at Eisenhower, Generals Highway, Crownsville

The AACo Bureau of Watershed Protection & Restoration is excited to continue our seasonal “Watershed Walk” program! Learn from the experts about how these projects work to improve water quality for Anne Arundel County and enhance riparian habitat for wildlife. Excitingly, this course has really earned the title of, “Preserve” as it boasts high-quality habitat for a wide variety of native animal and plant species. Most notably on this tour, we will focus on the diverse community of bird species, along with some signs of our favorite local ecosystem engineers...beavers! The maximum group size is 20 people, so reserve your spot now!

For more information or to register, click [here](#).

Upcoming Events

Take the ‘Explore the Gunpowder Watershed Challenge’ (Gunpowder Watershed (Baltimore County, Carroll County, Harford County), MD)

April 22 thru Friday, May 31, 2024

Get outdoors in support of land preservation and clean water! This year, Gunpowder Valley Conservancy (GVC) is kicked off its challenge on Earth Day, April 22nd! It is a 40 day-long hybrid, at-your-own-pace event where participants are encouraged to connect with nature, local businesses, and environmental stewardship. All you have to do is complete one or both of our challenges at your own pace between April 22 and May 31. There is a 35-mile Activity Challenge using the Pacer app (\$35) and a Passport Challenge (free, file attached).

For more information or to register, click [here](#).

Expedition: Chestertown Environmental Justice Walking Tour

Wednesday, May 1, 2024, 10 am – 12 pm

Location: Chestertown Marina LLC, South Water Street, Chestertown

Join the ShoreRivers’ Community Engagement department as we take a walking tour of Chestertown. The tour will explore environmental justice and the geography of privilege in historic Chestertown. Walking past waterfront homes, hidden streams, and bricks that tell stories, you are sure to learn something new about Chestertown’s past and present relationship with water. The tour will start and end at the Chestertown Marina.

Spring Saunter Along the Canal: Riley's Lock (Potomac, MD)

Wednesday, May 1, 2024, 10 am – 12:30 pm

Join us for a leisurely walk on the Towpath along the C&O Canal National Historical Park. We’ll focus on the general natural history of the varied habitats along the Potomac River and Canal. We’ll stop to observe birds, wildflowers and other plants, butterflies, snakes, turtles, and whatever else we might find.

For more information or to register, click [here](#).

Spring Early Birds: Kenilworth Aquatic Gardens, DC

Friday, May 3, 2024, 7:30 – 10:30 am

Immerse yourself in the phenomenon of spring migration. We’ll search for both resident and migrating birds by sight and sound. As we develop skills for finding birds in the field, we’ll also discuss the arrival sequence of spring travelers—and the departure of overwintering species.

For more information or to register, click [here](#).

Family Walk at Woodend Nature Sanctuary

Saturday, May 4, 2024, 9 – 10 am

Join our expert naturalists on a leisurely walk through the habitats at Woodend Nature Sanctuary in Chevy Chase, MD. Explore the wonders of trees, meadows, streams, insects (such as this bee enjoying a blueberry flower in our learning garden), birds, and everything Woodend has to offer!

For more information or to register, click [here](#).

Tree Care Workshop

Saturday, May 4, 2024, 10 am – 12 pm

Location: 9120 Frederick Road, Ellicott City

This workshop will cover tree selection, planting, and watering with a special focus on tree pruning.

For more information or to register, click [here](#).

Lauren's Garden Service will be at Robinson Nature Center's Native Plant Palooza

Sunday, May 5, 2024, 12 – 4 pm

Location: 6692 Cedar Lane, Columbia

We'll have a great selection of native plants available for you including perennials, shrubs and trees. Our planned inventory will be shared to our Facebook event page soon!

For more information or to register, click [here](#).

Oakland Mill's Interfaith Center Green Spring Fling

Sunday, May 5, 2024, 12:30 – 4 pm

Location: 5885 Robert Oliver Place, Columbia

Those who register will receive a native plant to bring home. Great activities for all to learn how to be better stewards of our watershed.

For more information or to register, click [here](#).

Introduction to Butterflies and Moths (In person lectures and field trips)

May 6 thru June 17, 2024, M, 7 – 9pm

Location: Woodend Sanctuary

Member Fee \$270.00 - Nonmember Fee \$320.00

Butterflies and moths are often the first insects the public thinks of when they think of insects at all, but they are much more than monarch butterflies and luna moths. In this class we will explore how to identify butterfly and moth families; their evolution, life history strategies, and unique adaptations; and the vital role they play in local ecosystems. Field trips and class projects will focus on observing immature stages of Lepidoptera, rearing butterflies and moths for ID purposes, and surveying for adult Lepidoptera in the field.

Oregon Ridge Nature Center CleanUp

Sunday, May 12, 2024, 1-3 pm, Register [here](#)

Sunday, June 9, 2024, 1-3 pm, Register [here](#)

We need your help to restore habitats and remove invasive plants in the park! A brief overview of some of our offenders will be presented and we will begin to manually remove them along the Red Trail at the future site of the Woodland Restoration Garden. We will branch out into other areas of the park, hoping to encourage the return of our lovely native plants. Tools will be available, but you are welcome to bring your favorites along with work gloves.

Tidy Up Talbot 2024

Saturday, May 18, 2024, 8 am – 3 pm

Location: 672 West Glenwood Avenue, Easton

This year, we are offering the opportunity to pick up trash anywhere in Talbot County that you think needs cleaning. Supplies can be picked up the morning of the event. You can also email us and arrange to pick up supplies in the week leading up to event. These supplies include trash bags, gloves, and a limited number of neon safety vests. A dumpster is being provided by Patuxent Companies, and recycling bins by the Maryland Environmental Service, so bring your bagged trash and bagged recycling to the Phillips Wharf Environmental Center (inside Easton Point Park). We'll have snacks available for all participants.

Fungi or Amoeba? The Mystery of Slime Molds

Saturday, May 18, 2024, 10 am – 2 pm

Location: Herring Run Park, Natural History Society of MD

Is it a plant? No. Is it an animal? No. Is it a fungi? No. What is it? It's a slime mold - a simple organism that consists of an acellular mass of creeping gelatinous protoplasm containing nuclei, or a mass of amoeboid cells. They move. They appear, They decompose. They disappear. Not really so simple.

How a Return to Tribal Management is Restoring Landscapes

Tuesday, May 21, 2024, 7pm

Tribal people have lived in North America for at least 10,000 years, shaping how the landscape evolved and functioned. During that time, they developed cultures and traditions that stressed the obligation tribal people had to the foods, medicines, and places that sustained and defined their way of life. However, disease and settlement disrupted the balance, replacing it with the extractive management approach that has dominated the landscape for the past three centuries. Discover how a return to tribal practices can help restore that balance. We will reveal how the last 50 years have seen a resurgence of tribal self-determination, and how indigenous knowledge is helping reestablish healthy relationships between people and the land.

Kayaking: Sunrise Paddles

Saturday, June 8, 2024, 5 – 7:30 am or

Wednesday, July 24, 2024, 5 – 7:30 am

Location: 100 Lafayette Street, Havre de Grace

Avoid the heat of the summer days by setting out on the Chesapeake Bay and Lower Susquehanna Flats by joining us for an early morning paddle. Note: All gear and basic paddle and safety instructions will be provided before launch. Class is weather permitting.

For more information or to register, click [here](#).

Expedition: CBEC Family Wetland Exploration Day

Saturday, June 8, 2024, 10 am - 12 pm

Location: Chesapeake Bay Environmental Center, Discovery Lane, Grasonville

Join ShoreRivers' Education Department team to explore the wonders of the wetlands at the Chesapeake Bay Environmental Center in Grasonville. This free expedition is designed for families and includes a 15-minute, stroller friendly hike to a riverside wetland where participants will learn about the functions of the wetland and discover the wildlife that depends on this unique habitat. Afterward, families are encouraged to stay and play at the beach adjacent to the wetlands.

Expedition: Granary Creek Paddle with the Miles-Wye Riverkeeper

Thursday, June 27, 2024, 10 am – 12:30 pm

Location: 611 Wye Island Road, Queenstown

Join Miles-Wye Riverkeeper Ben Ford for a morning paddle on Granary Creek in the Wye River. Participants will launch from the Granary Creek Picnic Area on Wye Island and will paddle along a serene creek bordered by woodlands and marsh. Optional post-paddle picnicking is available at the launch site.

For more information or to register, click [here](#).

Kayaking: Historical Waterways

Wednesday, July 3, 2024, 6 – 8 pm

Location: The Havre de Grace Maritime Museum, Lafayette Street, Havre de Grace

Join the Environmental Center at the Havre de Grace Maritime Museum to find out about the historical uses of the Chesapeake Bay and the Susquehanna River as we explore historical sites via the water. As we explore the Bay, learn how the historical waterway has changed and evolved to current modern modes of transportation and recreation. This trip highlights the emphasis that our city puts on the water and sites that were used in historical times such as the Concord Point Lighthouse, Tidewater Marina, Lock House Museum, and the Decoy Museum.

For more information or to register, click [here](#).

Kayaking: Coastal Geology of the Bay

Wednesday, July 10, 2024, 6 - 8 pm

Location: The Havre de Grace Maritime Museum, Lafayette Street, Havre de Grace

Learn about the coastal sedimentation along the Chesapeake Bay as well as the geological processes that shape our landscape. Learn how geology impacts the regions diversity of plants, wildlife, and urban development. We'll discuss fossils, take sediment core samples, and learn the geologic periods that the Bay covers while enjoying the sights from the water.

Registration for Summer CBLP 2024's Level 1 session is now open!

The CBLP Level 1 credential focuses on the design, installation, and management of sustainable landscapes and green infrastructure, taught by regional experts through classroom learning and field-based practicums. We offer both hybrid and in-person learning options.

Hybrid Option – One online session comprised of two half-day interactive online classes via Zoom plus one full day, in person, field practicum. Online classes – July 30 & August 1

Field practicum options:

Columbia, MD | August 15

Washington, DC | August 22

Easton, MD | September 11

Lancaster, PA | September 26

In Person Option – two full days in person – one classroom and one in the field:

Columbia, MD | August 14-15

Easton, MD | September 10-11

Lancaster, PA | September 15-26

Registration is a 2-step process: apply online, await approval, then return to the website to pay and select dates.

Discounts are available for companies sending three or more employees to Level 1, and scholarship opportunities can be found on our website. CBLP course attendees may earn continuing education credits from numerous professional organizations- check out our website for the full list.

Funding and Material Support

New Grant Opportunity with the Chesapeake Bay Trust – Urban Trees Mini Grant Program

Deadline: Rolling

Communities that would like to implement small tree planting projects are encouraged to seek support and funding through this opportunity. Regions of the State in Which Tree Planting Projects Can Occur: Tree planting proposed must occur in urban areas with low median household income levels, high unemployment, and neighborhoods with housing projects or that were historically red-lined at any time. Local governments, non-profit organizations, community and homeowner associations, faith-based organizations, and more are encouraged to apply.

For more information or to apply, click [here](#).

Chesapeake Bay Trust - Community Engagement Mini Grant

Deadline: Rolling

Designed to support activities that enhance communities, engage residents, and improve natural resources. They fund small-scale activities such as tree plantings, rain gardens, stream cleanups, and storm drain stenciling, among others.

For more information or to apply, click [here](#).

Chesapeake Bay Trust Grants and Opportunities

The Chesapeake Bay Trust's grant-making strategies are shaped by three core objectives; environmental education, demonstration-based restoration, and community engagement. We look to these objectives as basic touchstones for developing our programs, engaging new partners, and communicating about our work.
